

Reports

Reports module enabling manual extraction of national roadworks and traffic management data.

Business intelligence data for highways

The one.network Reports module enables users to interrogate and output data from one.network. It provides access to a unique national roadworks and traffic disruptions dataset spanning the strategic and local road networks for the whole of Great Britain.

With Reports module users can download planned roadworks, public events and traffic management interventions from over 300 public authorities and a similar number of utility companies and public events organisers.

Features

- Data can be filtered by area, date range, traffic impact and activity type.
- Data is output in CSV file format for easy loading into Excel or BI software

If you would like to know more about the one.network Reports module, please contact us.
